

MY DENTAL  
CHECK-UP

AT SCHOOL

A dental team is coming to my school.

This is a hygienist.

The Hygienist will use a light to count my teeth.

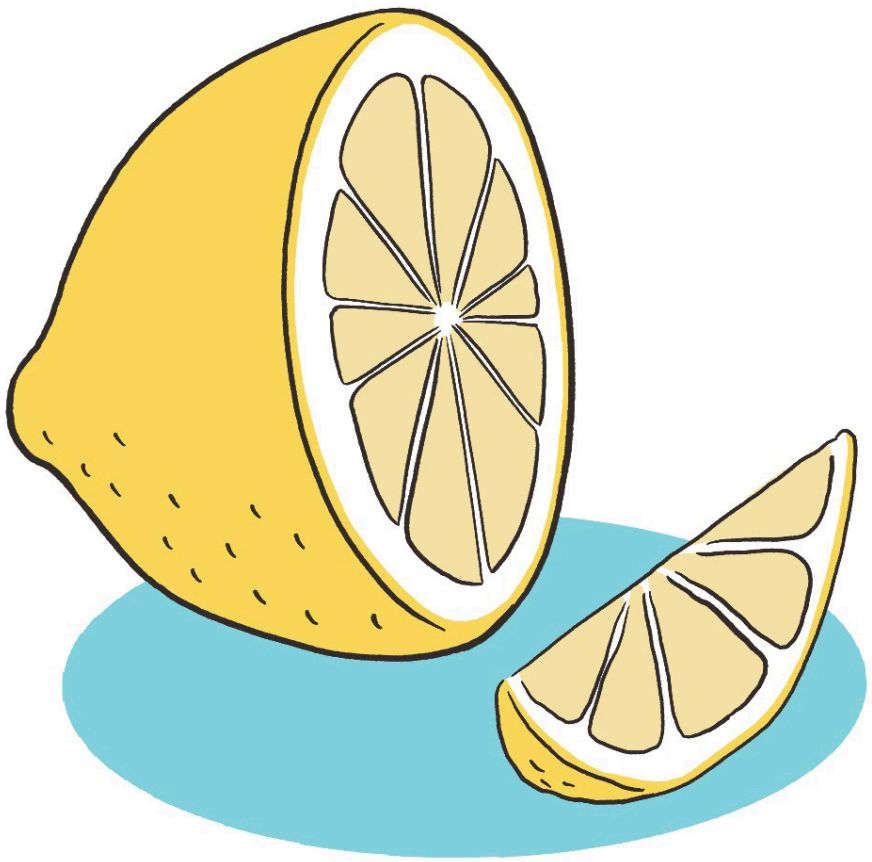

The hygienist will look at my teeth, while I open wide.

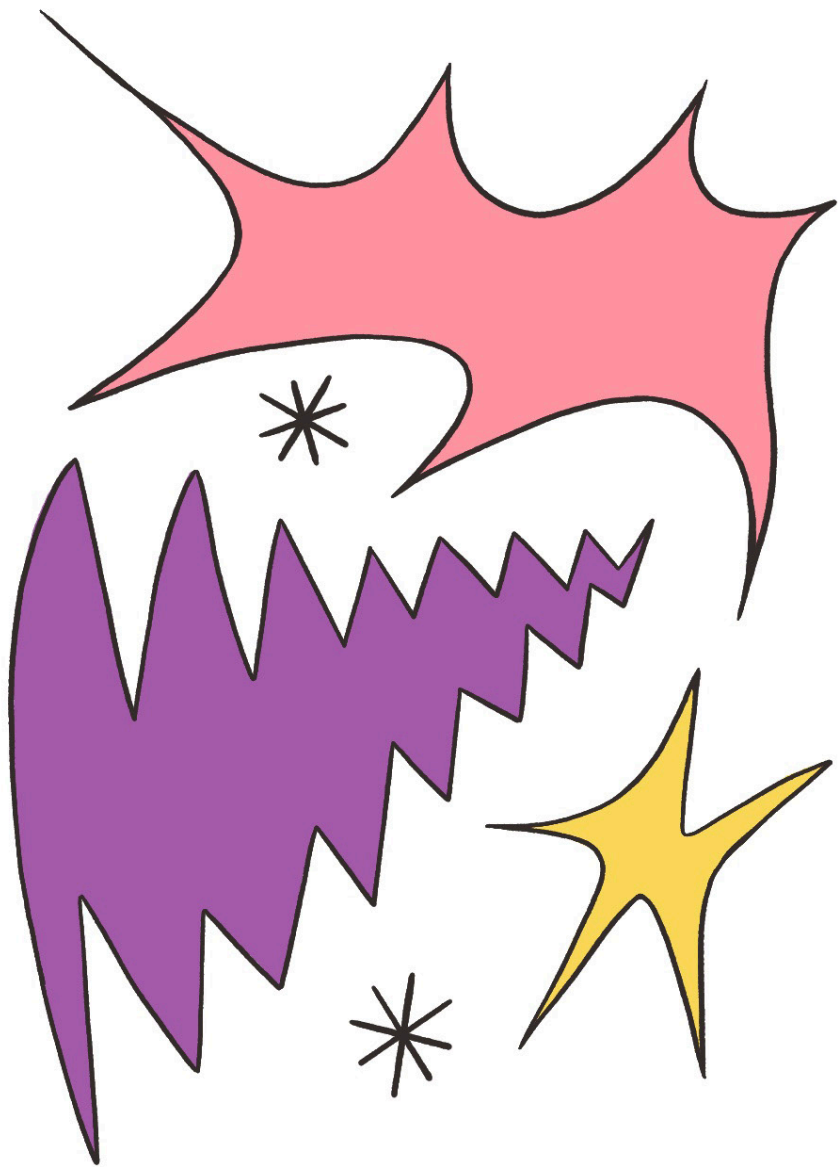

The hygienist will brush my teeth with a toothbrush.

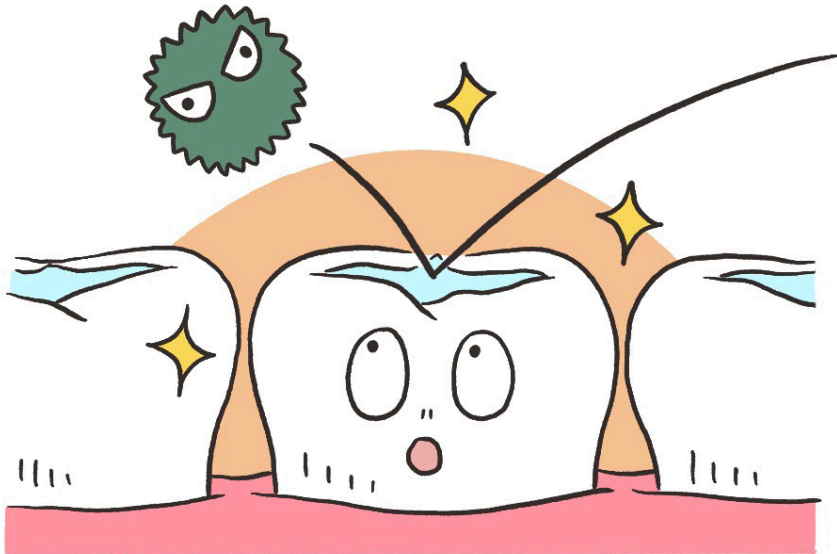

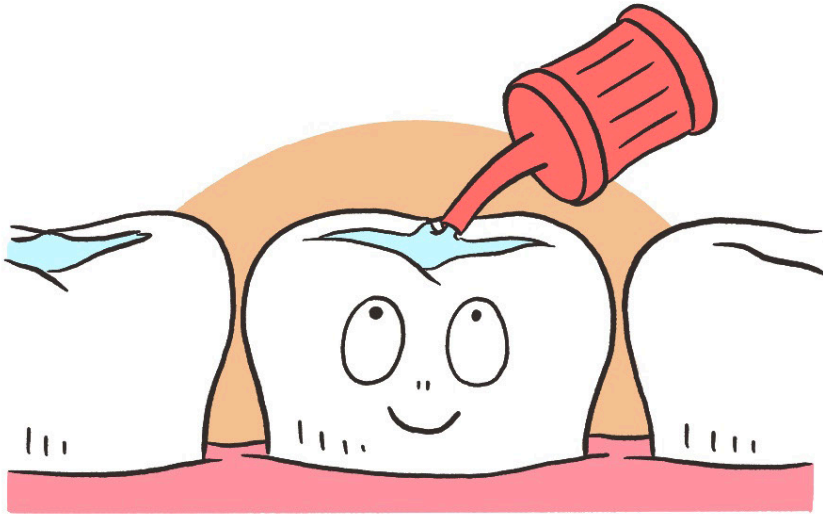

There might be a sour taste like a lemon.

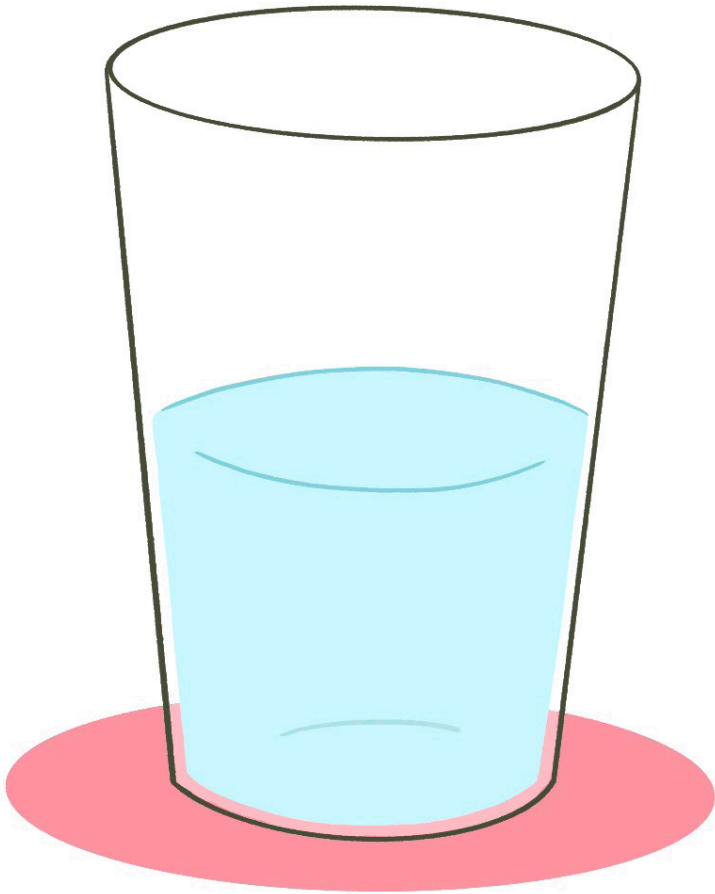

There might be loud noises.

The hygienist will place sealants on my grown-up teeth.

The hygienist will place fluoride on my teeth.

I will get a cup of water to drink when I'm done.

I will get prizes after seeing the dental team, and my teacher will be so proud of me.

This book empowers educators and guardians to prepare children for their dental screenings and sealant procedures, particularly those requiring additional support.

By familiarizing children with the tools the dental hygienist might use, as well as the sounds and tastes they might encounter, this book turns what could be a daunting situation into a positive learning experience for healthy smiles!
