## This is an oral health screening for:

Name of Child: \_\_\_\_\_ Date: \_\_\_\_\_  
(Last) (First)

A screening is a quick look and does not take the place of a complete examination by a Dentist or a Dental Therapist. Serious oral health problems may be missed in a screening.

### DENTAL SCREENING RESULTS

No visible signs of oral problems. See your Dentist or Dental Therapist at least yearly for preventative dental appointments.

Visible signs of oral problems were found. Visit a Dentist or Dental Therapist in the next several weeks, before your child's next preventative dental appointment to treat possible cavities or more serious problems.

Visible signs or symptoms of serious dental problems were found. Possible large cavities, pain, swelling, infection, or abscesses were present. A visit to a Dentist or Dental Therapist is recommended in the next 0 – 2 weeks.

### DENTAL SEALANTS

Sealants were placed on your child's back teeth (molars).

Partial sealants were placed. Sign up again next year.

Sealants were not placed on your child's teeth because:

- The teeth may have cavities. Please follow-up with your dentist.
- The teeth have fillings.
- The teeth have sealants.
- The teeth were not grown in far enough for sealants.
- The procedure was too difficult for your child.

### AFTER GETTING DENTAL SEALANTS

- Sealants only protect the back teeth. Brush and floss daily to keep teeth healthy.
- You may not be able to see the sealants, or they may look white or cream colored.
- It may feel strange to bite for a day or two. That feeling goes away.
- An allergic reaction is possible, but it is very rare. If you notice any unusual symptoms in your child after treatment, call your child's doctor.
- Eat soft foods for the next 24 hours.

**RECEIVED FLUORIDE VARNISH:**  Yes  No

### AFTER GETTING FLUORIDE VARNISH

- Your child should not brush their teeth or floss for 24 hours
- Avoid hard foods such as pretzels, candy, and apples
